

ABSTRACT OF THE DISCLOSURE

5 A collapsible structure has a first panel, a second panel, and a third panel. Each panel has a foldable frame member having a folded and an unfolded orientation, with a fabric material covering portions of the frame member to form the panel when the frame member is in the unfolded orientation. One first side of the first panel is coupled to one side of the second panel, and one side of the third panel is coupled to the fabric of the second panel.
